

FOR MEMBER OF THE CITY COUNCIL

David Farley

Age: 57

Occupation: Physicist/Business Owner

I am running for Council to continue my public service, leveraging my strong background and leadership skills to provide an informed, objective approach to the issues facing Livermore.

I have been a US Naval Officer and military pilot, managed clean energy projects around the world from 2000-2010, and a PhD physicist at both Lawrence Livermore and Sandia National Labs since 2010. At the Labs, I work on clean energy, artificial intelligence, nuclear policy and quantum technologies. I also own a small high technology business, with a contract to develop a quantum education program at a Historically Black College and University. I am a Commissioner for Livermore Airport and coach girl's lacrosse at Granada High School.

My priorities are to promote clean energy and grow small businesses, smart housing development that does not break the Urban Growth Boundary, maintain public safety, and fiscal prudence. I have suggested my "empty nester" housing development idea to the General Plan Advisory Committee, and will work with Livermore's Sustainability Manager to implement smart clean energy. I will carefully monitor budgets, and fully support our public safety officials.

Endorsements: David Smith, Mayor Emeritus, City of Newark (longest serving CA mayor); and Adam Halsey, President, Livermore Phantoms Lacrosse.
